Objective

Computer Science undergraduate seeking a Software Engineering Internship with a strong foundation in software development, applied AI, and full-stack engineering. Experienced in building scalable applications, AI-powered tools, and end-to-end machine learning pipelines with a focus on clean code, performance, and practical problem solving.

Education

Yeshwantrao Chavan College of Engineering

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.9)

Nagpur, MH

Expected 2027

St. Xavier's High School

Higher Secondary Certificate (HSC)

Nagpur, MH

2022

Experience

Open Source Software Contributor – *PEcAn Project*

Jan. 2026 – Present

Remote

- Contributed **8+** pull requests to the **PEcAn** open-source ecosystem, delivering **bug fixes**, **regression tests**, documentation improvements, and package maintenance.
- Collaborated with **maintainers** through **code reviews** and **CI debugging**, with multiple pull requests **merged** into the upstream project.
- Working with **project mentors** to **refactor** and **parallelize input processing pipelines** for improved **scalability** and maintainability.

Projects

Agentic Research Swarm | *Python, LangGraph, FastAPI, Ollama*

Jun. 2026 – Present

GitHub

- Built a **multi-agent research system** with planner, researcher, analyst, and writer agents.
- Implemented asynchronous workflows for **task execution**, **web search**, and report generation.
- Integrated local and cloud **LLMs** with **structured outputs** and source-backed responses.

Code Intelligence Engine | *Rust, Node.js, TypeScript, LMDB*

Apr. 2026 – Jun. 2026

GitHub

- Built a hybrid **code analysis engine** using **Rust** and the **TypeScript Compiler API**.
- Implemented **symbol indexing**, **call graph generation**, and semantic code analysis.
- Integrated **LLM-assisted** code explanation and refactoring in a **local-first architecture**.

Portfolio CMS | *Flask, Python, PostgreSQL, GitHub API*

Dec. 2025 – Mar. 2026

GitHub | Live Demo

- Built a full-stack **CMS** that generates developer portfolios from **GitHub repositories**.
- Implemented **authentication**, profile management, and **PostgreSQL**-backed data storage.
- Deployed the application on **Render** with **GitHub API** integration and a responsive UI.

Technical Skills

Languages: Python, C++, C, Rust, JavaScript, TypeScript, SQL, R, HTML/CSS

Frameworks & Tools: Flask, PyTorch, TensorFlow, Pandas, NumPy, Git, Docker, Linux, MongoDB, PostgreSQL, LangGraph

Certifications

Stanford University – Data Structures and Algorithms

Udemy – Complete Python Bootcamp

Activities

Open Source (Hacktoberfest) | Campus Ambassador(RINEX) | Volunteer (TechFest 2024)
